

m2 is a micro fiber produced by Hyosung's own direct spinning technology. Its characteristics are super micro soft touch and easy finishing, just like any natural fiber.

[Characteristics]

- A micro-soft touch, bulkiness, flexibility and deep color
- Lightweight luxury fabrics
- Excellent post-process
- No loss due to de-weighting in the finishing
- Cost-effectiveness and environmentally-friendly characteristics

[m2-AN INNOVATION OF POLYESTER FIBER!]

Soft and comfortable touch is essential factor for artificial suede. m2's fine micro filament makes m2 as soft as silk.

Its unique combination of softness and bulkiness make it ideal for a broad range of apparel and home textile application.
